TIME FOR A RETREAD?

STEP UP TO FIND YOUR SIZE

Put on any socks that you would be wearing with the footwear before taking the measurements.

Sit down and only have the weight of your lower leg on the paper. Don't stand and draw around your foot as the total body weight expands your foot and you will get an exaggerated measurement.

If a toe crosses a line, select the next size up to allow a gap. Measure both feet and fit for the longest foot.

For accurate printing of this guide, please ensure to check pdf settings are on A3, Portrait and Actual Size.

STANDARD SIZING GUIDE*

Size 4 - 14 are a wider fit than standard boots*

8W - 12W are Ultra-Wide

Ultra-Wide Fitting Options available if required. If you have a unique foot width, our Ultra-Wide size should be a solution for you. Please call your BISON representative for any assistance.

PLACE HEEL HERE ON DASHED LINE

This measure is a guide only and will work for all our safety boots. Only the boot range shown on this guide are Wide and Ultra-Wide. For fitting accuracy we recommend trying on the Safety Boot.
